

TESTIMONIALS

“Regarded by all as a model project, particularly for Health & Safety and collaboration.”

– Dave Holland, Fonterra Co-operative Group

“ Challenges arising from the project’s tight timeframe were overcome by bringing contractor Apollo Projects Ltd on board early via a sole source negotiated contract. The sole source design build contract saved at least three months on the project schedule, and enabled the contractor to get involved in the project at a very early stage in the design. The early formation of the Beca/ Apollo/ Fonterra team had immediate benefits to the project.”

– BECA, clientside project manager for the Fonterra Whareora Project

**WE PROMISE
CERTAINTY.
TRUSTED EXPERTISE
FROM A PROVEN
SPECIALIST**

“The design team Apollo assembled was first rate and contributed significantly to what has proven to be a first class facility. Apollo’s performance in managing this design process was also to a very high standard. Apollo certainly excels... in the incorporation of buildability and construction input into the design process. This ensured that the majority of the design issues were clarified prior to the construction phase on site.”

– Murray Darrall, Modernisation Manager, Property and Retail Development, Foodstuffs (Wellington) Co-operative Society Ltd

APOLLO'S PROMISE

- Specialised – detailed understanding of every aspect of design and delivery
- Total Project Solution – from concept design to construction and facility handover
- Industry-leading – design and procurement methodologies
- Client Focussed - the client's objectives lead the design
- Innovative Thinking – challenging the status quo
- Trust and Expertise – our reputation is everything
- Track Record – for delivery of projects on time and within budget

**DIVERSE EXPERIENCE, MULTI -
DISCIPLINED BACKGROUNDS AND
HIGHLY SPECIALISED KNOWLEDGE
OF THE LATEST TECHNOLOGIES AND
DESIGN SOLUTIONS**

We offer a 'One Stop Shop' – fully integrated delivery solution tailored to the individual client, including:

- Initial Planning and Strategy – Early Contractor Involvement (ECI)
- Budgets and Feasibility
- Design Management
- Quantity Surveying
- Consents and Approvals
- Procurement and Cost Control – supply agreements with key project partners
- Construction Management
- Health and Safety
- Commission, Training and Handover

HEALTH & SAFETY

**OUR CORE VALUE SAYS
IT ALL – 'SAFETY ABOVE
ALL ELSE', AND WE MEAN
IT! WE HAVE WORKED
WITH SOME OF THE
MOST INTENSIVE H&S
PROGRAMMES IN NZ
AND WE WOULD PUT
OUR REPUTATION UP
AGAINST ANYONE**

AND BUILD - BEING
INVOLVED IN THE
EARLY DESIGN AND
MANAGING THE FULL
CONSTRUCTION
PROCESS IS WHAT
SETS US APART**

Apollo caters for the storage requirements of any specified product, from dairy to produce. We have a sound understanding of all the requirements relating to industry-leading cold storage facilities.

Apollo understands the forever evolving nature of bulk storage and inventory control. Our design approach is strongly data driven and our experience shows it is critical that the concept developed is based on the nature of the product in storage, the client's business model and inventory control mechanisms.

Apollo carefully selects the appropriate insulated panelling for the application, meeting the requirements of a cost-effective solution to fire safety, ease and speed of construction, high thermal R-Values and zero water retention.

From concept to design, we have a highly skilled team that will develop a system that best encompasses your product lifecycle requirements. Our project delivery expertise includes:

- Resource and building consent application and management
- Structural and thermal building design
- Post-tensioned slab technology
- Selection and flow design of storage and racking systems
- Inward and outward product logistics
- Refrigeration
- Electrical
- Fire protection
- Project/construction management
