

TESTIMONIALS

"Time-frames were extremely tight and with a major police station usually taking 2-3 years to design, plan and build we knew from the start that this project wasn't going to be like anything we had done before. Collaboration was going to be key to success and Apollo worked closely with our project managers, designers and key staff to ensure the end result met our project objectives. Construction of the new building began in May 2012, and the first Po-lice staff moved in just seven months later. Total construction time to full handover was just nine months.. Apollo Projects was able to come on-board and leverage their existing supplier and sub-contractor relationships, as well as their extensive knowledge of innovative and practical design solutions to give us what we needed.

- Sean Pont, Director, Logic Group
New Zealand Police Station Christchurch

TURNKEY DESIGN AND BUILD - BEING INVOLVED IN THE EARLY DESIGN AND MANAGING THE FULL CONSTRUCTION PROCESS IS WHAT SETS US APART

Apollo has the proven expertise and resources to deliver a wide range of technically demanding projects across the retail and commercial office markets – from a boutique retail village, to a multi-level high-rise office complex.

The leadership team at Apollo has extensive experience in all phases of pre and post commercial construction. From site identification and evaluation, to conceptual and detailed cost estimating, management of the consenting process, design, construction and delivery of the end asset.

Apollo can offer full turn-key solutions or value in individual services and takes pride in delivering high energy performing, first class architectural designs.

Apollo understands the importance of the balance between natural light and sun glare, architectural presence and energy efficient materials, as well as fit-for-purpose operating systems.

We know that successful commercial premises require creativity, practicality and a comprehensive understanding of the end-user (tenant).

Apollo has a development arm that have undertaken a wide-range of retail and office development, so we appreciate first-hand the importance of end-user flexibility, base build efficiency, fit-out integration and total ownership of asset considerations.
