Apollo
PROJECTS

We're specialists in designing and building dairy processing and storage facilities.

Aotearoa is a world-leading exporter of dairy products, and at Apollo Projects, we design and build facilities that use the latest in dairy technologies to support this thriving industry.

Our portfolio includes Fonterra's Edendale facility in Southland, Waikato Innovation Park's Spray Dryer plant, the Open Country Cheese factory in the Waikato, and Synlait's world-first infant formula blending and canning facility near Christchurch.

Our team of highly experienced engineers, project managers and construction specialists have worked on several major dairy production projects, and they know how to deliver a highly sophisticated set up.

We understand the level of precision dairy facilities require and the numerous components that need to work together, such as cold stores, pasteurisation and sterilisation technology, and systems to turn liquid milk into powder.

In all of our dairy construction projects we take care of the full process, from resource and building consents; process flow design; fire protection; Good Manufacturing Processes (GMP); and wastewater treatment; to hygiene design; health and safety; and coordinating with vendor processes and system operators.

Whatever your needs, Apollo Projects will work alongside you to design and build a facility to take your products from raw material to market. Get the dairy processing facility you need, with Apollo Projects.

Your trust is everything to us.

Apollo Projects has been delivering stunning facilities for organisations across Aotearoa since 2001. Our years of experience and highly skilled team ensure your building performs at its best, includes sustainable design, and is a project you can be proud to own.

When our founding directors, Craig Waghorn and Paul Lloyd started Apollo, they were determined to do things differently. They wanted to partner with clients from the very start and take peoples' building ambitions from concept all the way to reality – something the industry hadn't been doing.

We've grown a lot since those early days, but we've never lost sight of what matters most to us – building trusting relationships with the people we serve. It's central to the way we work.

Apollo Projects is different simply because we do the mahi as your partner and use our expertise to ensure your completed facility does what it should, on time and within budget.

It's our belief that a client's trust is everything, and we are as committed to this today as we were the day it all began.

We raise the bar and lead the way.

At Apollo Projects, we've never been afraid to raise the bar even higher and set new standards for what is possible. For us, success isn't something you leave to chance. We believe that the best buildings start with a solid foundation – their design.

Unlike other construction companies, we'll partner with you from the very start to ensure your design works for you. This means getting involved in your project at the beginning and taking the journey with you right up until we hand you the keys.

We listen to your needs, talk to the right trades early, and craft innovative solutions that ensure your building performs as it should. It's a way of working that reduces the risk of your project needing costly design changes down the track.

Our experts know what works and what doesn't, and our partnerships with key consultants and contractors ensure you're getting competitive prices, quality and performance, every time.

Talk to us today about making your project a reality.

Fonterra Whareroa

"The professionalism that Apollo Projects have shown throughout the Edendale Redline upgrade is to be commended. This project had a challenging time constraint window which Apollo managed extremely well, and now the site has one of the best redlines in a Milk Treatment area in the country."

Julie Walkinshaw, Plant Manager
Fonterra Cooperative Group

Waikato Innovation Park
