Apollo
PROJECTS

Expand or upgrade your facilities with confidence, thanks to our leading expertise.

Whether you need to extend your office space, grow your retail area or upgrade your production facility, Apollo Projects has the experience to make your project a success.

For every project, we assemble a team of trusted engineers, architects and contractors to ensure the end result performs as it should, on time and to budget.

Unlike new builds, renovations and refurbishments often need to happen while your building is still operating. We understand how to get the job done with the least impact on your business. For example, we've delivered upgrades for dairy and cold storage clients who have high sanitation needs, as well as logistical requirements. It all comes back to our experience and our approach to always partnering with our clients.

And because we listen to our clients' needs from the beginning, we reduce the risk of projects needing costly design changes down the track.

Our team takes care of each stage of the refurbishment process, from initial planning and strategy; budgeting, feasibility and quantity surveying; right through to design management; building and resource consents; construction; health and safety; and handover.

Get the results you want from your building extension or refurbishment, with Apollo Projects.

Fonterra Edendale

Americold

Your trust is everything to us.

Apollo Projects has been delivering stunning facilities for organisations across Aotearoa since 2001. Our years of experience and highly skilled team ensure your building performs at its best, includes sustainable design, and is a project you can be proud to own.

When our founding directors, Craig Waghorn and Paul Lloyd started Apollo, they were determined to do things differently. They wanted to partner with clients from the very start and take peoples' building ambitions from concept all the way to reality – something the industry hadn't been doing.

We've grown a lot since those early days, but we've never lost sight of what matters most to us – building trusting relationships with the people we serve. It's central to the way we work.

Apollo Projects is different simply because we do the mahi as your partner and use our expertise to ensure your completed facility does what it should, on time and within budget.

It's our belief that a client's trust is everything, and we are as committed to this today as we were the day it all began.

We raise the bar and lead the way.

At Apollo Projects, we've never been afraid to raise the bar even higher and set new standards for what is possible. For us, success isn't something you leave to chance. We believe that the best buildings start with a solid foundation – their design.

Unlike other construction companies, we'll partner with you from the very start to ensure your design works for you. This means getting involved in your project at the beginning and taking the journey with you right up until we hand you the keys.

We listen to your needs, talk to the right trades early, and craft innovative solutions that ensure your building performs as it should. It's a way of working that reduces the risk of your project needing costly design changes down the track.

Our experts know what works and what doesn't, and our partnerships with key consultants and contractors ensure you're getting competitive prices, quality and performance, every time.

Talk to us today about making your project a reality.

"The professionalism that Apollo Projects have shown throughout the Edendale Redline upgrade is to be commended. This project had a challenging time constraint window which Apollo managed extremely well, and now the site has one of the best redlines in a Milk Treatment area in the country."

Julie Walkinshaw, Plant Manager
