Apollo
PROJECTS

We are Aotearoa's trusted experts in delivering sports, aquatics and education facilities.

Having designed and built successful sport centres, pools and education facilities, we know what it takes to deliver a finished venue that you and your community will love. It's about innovation, dedication and of course, experience.

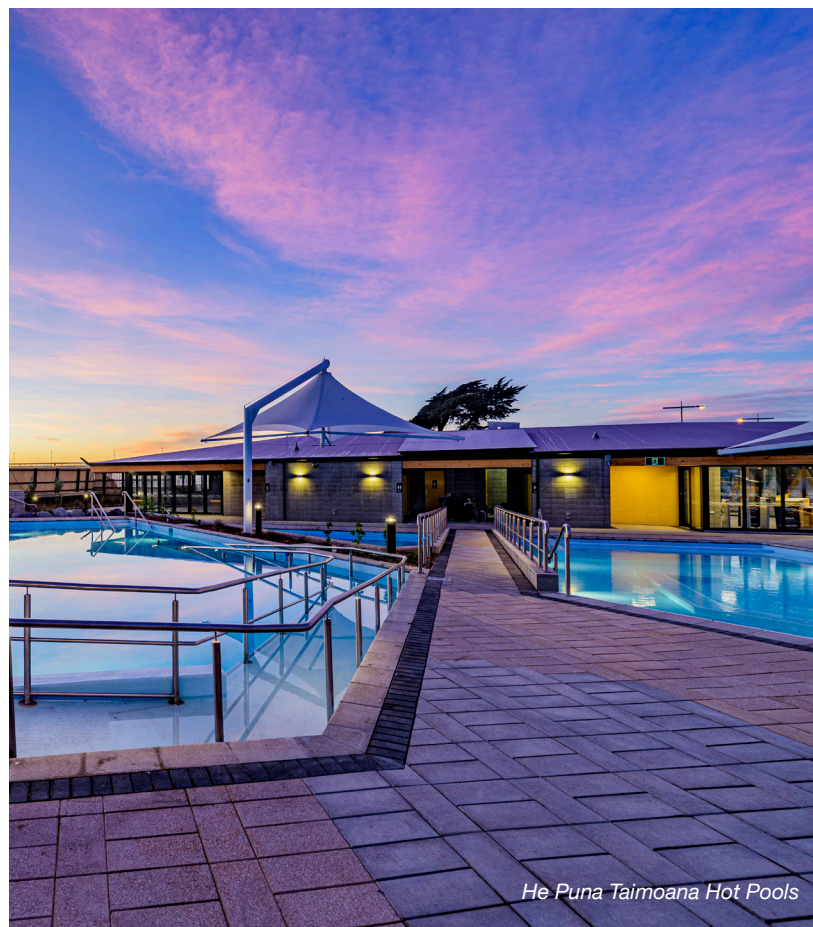

We've worked with councils, clubs and schools throughout New Zealand to reach their building aspirations and are proud of what we have achieved.

Our impressive portfolio includes the Selwyn Sports Centre; St Thomas of Canterbury College's learning studio and sports centre; the SwimTastic swim school; He Puna Taimoana Hot Pools; Te Pou Toetoe; Linwood Pool; and the award-winning Taiora: QEII Recreation & Sports Centre in Christchurch.

We pride ourselves on listening carefully to our clients, and crafting solutions that make their projects shine. It's an approach we bring to every piece of work we do.

We are specialists in the design and construction of sport, education, and aquatic facilities. We know exactly what materials, processes and designs will work best to achieve your goals. With Apollo Projects, you can count on receiving the very best advice that will shorten costly construction times and reduce the risk of design changes.

Make your recreation centre, swimming pool complex or learning facility an impressive building you can be proud to call your own.

He Puna Taimoana Hot Pools

Selwyn Sports Centre

Your trust is everything to us.

Apollo Projects has been delivering stunning facilities for organisations across Aotearoa since 2001. Our years of experience and highly skilled team ensure your building performs at its best, includes sustainable design, and is a project you can be proud to own.

When our founding directors, Craig Waghorn and Paul Lloyd started Apollo, they were determined to do things differently. They wanted to partner with clients from the very start and take peoples' building ambitions from concept all the way to reality – something the industry hadn't been doing.

We've grown a lot since those early days, but we've never lost sight of what matters most to us – building trusting relationships with the people we serve. It's central to the way we work.

Apollo Projects is different simply because we do the mahi as your partner and use our expertise to ensure your completed facility does what it should, on time and within budget.

It's our belief that a client's trust is everything, and we are as committed to this today as we were the day it all began.

QEII Recreation and Sports Centre

We raise the bar and lead the way.

At Apollo Projects, we've never been afraid to raise the bar even higher and set new standards for what is possible. For us, success isn't something you leave to chance. We believe that the best buildings start with a solid foundation – their design.

Unlike other construction companies, we'll partner with you from the very start to ensure your design works for you. This means getting involved in your project at the beginning and taking the journey with you right up until we hand you the keys.

We listen to your needs, talk to the right trades early, and craft innovative solutions that ensure your building performs as it should. It's a way of working that reduces the risk of your project needing costly design changes down the track.

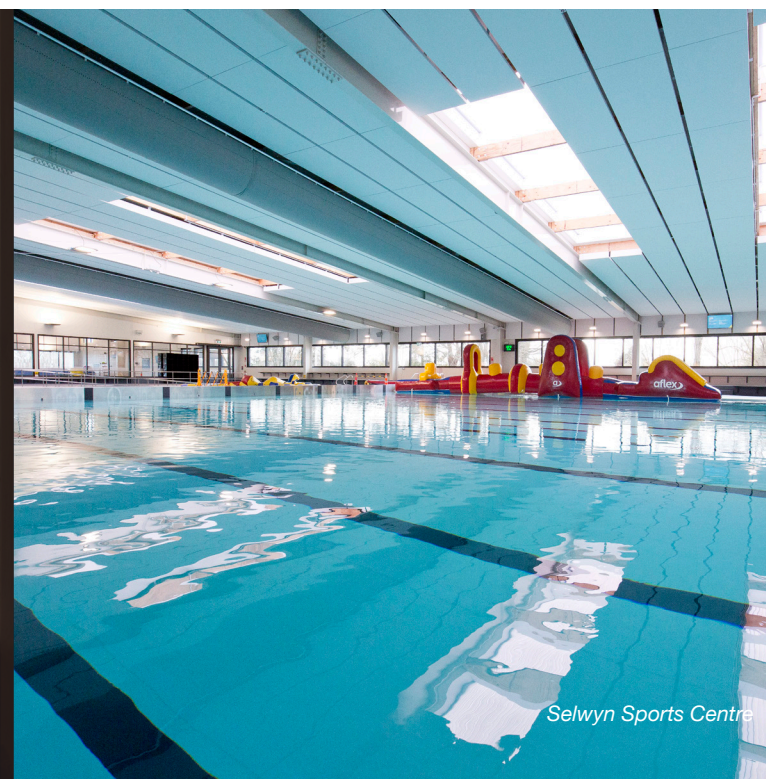

Our experts know what works and what doesn't, and our partnerships with key consultants and contractors ensure you're getting competitive prices, quality and performance, every time.

Talk to us today about making your project a reality.

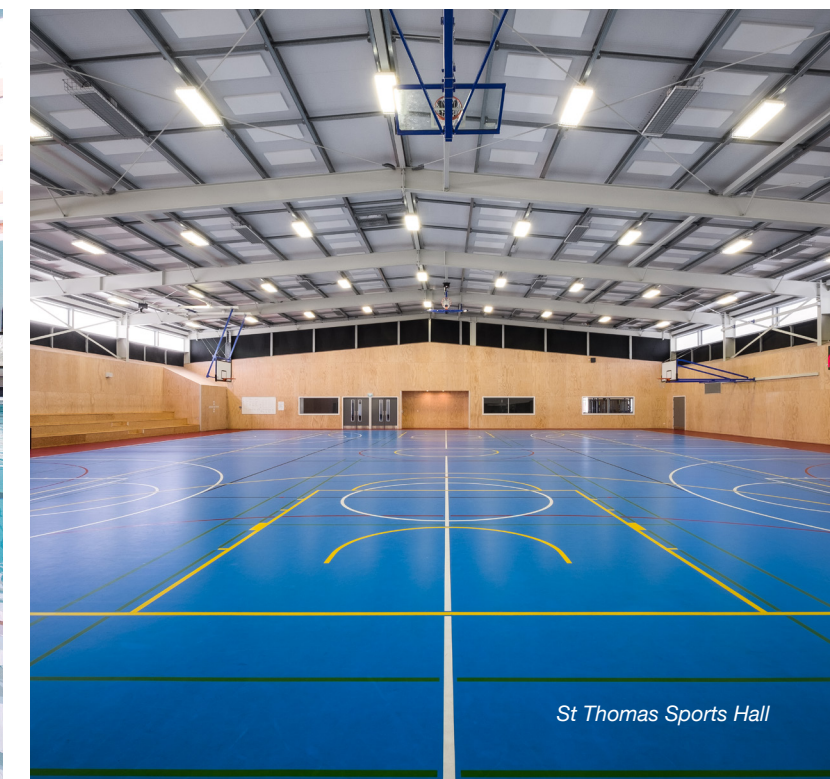

He Puna Taimoana Hot Pools

"Apollo Projects have been really responsive and totally professional, and nothing is a bother to their team. Their workmanship and Health & Safety practices to date are as good as I have encountered in my career, and they have developed an excellent working relationship with our Operational staff. I can't recall the last time a project looked so great and in such a completed state at handover. The quality is exceptional, far better than any of my recent "traditional" construction contracts."

Mark Noonan, Project Director
Christchurch City Council
